In order to maintain Raiffeisen Premium Banking status without the payment of any supplementary account keeping fee, one of the following conditions must be satisfied:

In respect of the last working day of the given calendar quarter

\* When calculating the aggregate savings balance, the Bank takes into consideration the following: balance of Raiffeisen current accounts, fixed deposits – in the case of foreign currency, converted into forint at the FX mid-rate effective on the given day – and the aggregate, effectively available closing balance of the securities account managed by Raiffeisen Bank.

In case of PayPass™ purchases below HUF 5 000, or below the defined amount in other countries outside Hungary, the Minicard can be used at PayPass acceptance points without signature or PIN code. In case of purchases above HUF 5 000, or above the defined amount in other countries outside Hungary (e.g. EUR 20), the cardholder has to approve the transaction with PIN code.

The bankcards with PayPass function are considered contactless bankcards.

The THM was determined in accordance with the current conditions and the legal provisions in force and monthly free of charge Premium Gold account package, and its value may change if the conditions change. The definition of the THM refers to a HUF 375,000 credit limit, for Premium (Oxigén) Gold Credit Card to the minimum of 450 000 HUF, for OneCard Gold Credit Card to the minimum 700,000 HUF credit limit and a 1 year term. The annual percentage rate valid for the amount of the final purchase limit approved on the basis of the individual contract – which may differ from the values indicated in these Terms and Conditions – is included in the Bank’s written notice, which is part of the individual contract. The settlement period taken into account in the calculation of the THM is the period between the 25<sup>th</sup> day of each month and the 25<sup>th</sup> day of the next month. If the limit date is not a bank working day, then the bank working day immediately preceding such date shall be taken into account in calculating the settlement period. The value of the THM does not reflect the interest risk of the loan. The annual percentage rate is calculated on the basis of the following formula:

$$H = \sum_{k=1}^m \frac{A_k}{(1+i)^{t_k}}$$

Where: H: the loan amount, less the costs related to the drawdown of the loan  
 Ak: the amount of the k<sup>th</sup> repayment instalment  
 m: is the number of repayment instalments,  
 tk: the time of the k<sup>th</sup> repayment expressed in years or part-years  
 i: value of the THM
